PROFESSIONAL SUMMARY

Solutions Architect and Senior Full-Stack Engineer with 15+ years designing and delivering scalable, production systems.

Specializes in multi-tenant SaaS platforms, identity systems, and long-term architecture that holds under real-world scale and operational pressure.

Proven track record of turning complex business requirements into reliable, maintainable systems used in production environments.

TECHNICAL SKILLS

Core Stack: C#, Node.js, TypeScript, SQL, .NET Core, Angular, React, Next.js
Architecture: Domain-Driven Design (DDD), CQRS, Modular Monolith, Microservices, System Design
Identity & Security: Azure AD (Entra ID), RBAC, OAuth2, JWT, B2C
AI Systems: LLMs, RAG, Vector Search, Prompt Engineering, AI API Integration
Databases: PostgreSQL, SQL Server, MongoDB, Prisma, EF Core
Cloud & DevOps: Azure, AWS, Docker, CI/CD, Vercel, Render

PROFESSIONAL EXPERIENCE

Senior Systems Engineer
TerraBarn Inc, Aug 2025 – Present

- Designed and implemented scalable multi-tenant SaaS architecture.
- Established system invariants to improve reliability and reduce long-term fragility.
- Translated complex business requirements into maintainable, production-ready solutions.
- Delivered high-quality features end-to-end with documentation and ownership.
- Contributed to architectural decisions and cross-team technical alignment.

Senior Full Stack Engineer
Comrise Risewave / Willis Towers Watson, December 2024 – August 2025

- Delivered enterprise-grade Income Review modules supporting financial data processing.
- Designed a configurable reporting engine with rule-based validation pipelines.
- Built scalable backend services focused on performance, reliability, and maintainability.
- Modeled database schemas and managed migrations for evolving business requirements.

Senior Full-Stack Engineer / Technical Architect
AOTech, February 2020 – November 2024

- Archiectected and delivered a multi-tenant Learning Management System (LMS) to production.
- Implemented scalable tenant isolation and role-based access control (RBAC).
- Built authentication and authorization flows for secure multi-tenant environments.
- Developed configurable business rule engine for complex workflow automation.
- Designed and implemented backend services and frontend architecture.
- Established CI/CD pipelines and engineering standards for production readiness.
- Led technical direction while actively contributing across the full stack.

Full Stack Developer
Kinetic Staffing, May 2016 – February 2020

- Delivered enterprise organization and role management platform.
- Built dynamic form builder and reporting dashboards end-to-end.
- Designed REST APIs and optimized database models for performance and scalability.

Software Engineer / UI-UX Specialist
Rumble Asia / Coffey International, September 2013 – May 2016

- Delivered enterprise portals and reporting systems.
- Built analytics dashboards and performance tracking applications end-to-end.
- Implemented responsive UI architecture and backend integrations.

Software Engineer
Trinko Inc / Optimum Innovatus / DBSoft / Pointwest, June 2010 –August 2013

- Delivered real-time reporting and back-office systems.
- Built streaming integrations and operational dashboards.
- Developed SMS notification and enterprise web solutions.
- Migrated legacy platforms to modern web architecture.

EDUCATION
Bachelor of Science in Computer Science
University of Santo Tomas, 2006 – 2010
